**CALL FOR PAPERS, PANELS AND TUTORIALS**

**Mini track on Game Based Collaborative Learning**

**Track chair:** Dr Wilfried Admiraal, University of Amsterdam, Amsterdam, The Netherlands

Today, learners have to be able to produce and not just consume, to make knowledge and not just receive it. Students want to do things that have meaning to them and to society, supported all the way by structure, leading to expertise, professional-like skills, and ability to innovate. Digital games seem to be excellent tools for facilitating and supporting this kind of learning. It makes a great deal of sense to try to merge the content of learning and the motivation of games. Moreover learning is a social process and computer technologies are not restricted to the individual learner. Rather, they provide rich opportunities for shared thinking and knowledge construction.

The overall objective of this track is to increase knowledge on how game based collaborative learning might be effectively and efficiently designed in various educational settings or other learning contexts. Papers are invited that report on empirical research as well as reviews of studies on collaborative and cooperative learning through gaming. Recommended topics include, but are not limited to, innovative designs, principles of social learning, collaborative learning through gaming, cooperation in game based learning, peer feedback, communication and interaction, differences between synchronous and asynchronous communication, effects on collaborative and cooperative skills, and the larger social context of learning.

### **Important information:**

The selection panel of the conference committee will consider all abstracts received by the submission deadline to ensure that the proposed paper is relevant to the Conference. The authors of abstracts, which describe a relevant paper, will receive a notification of abstract acceptance. All full papers will be blind reviewed by members of the conference committee to ensure an adequate standard, that the proposed subject of their abstract has been followed, that the paper is of a suitable length, that the standard of English is adequate and that the paper is appropriately referenced. Papers that are accepted will be published in the conference proceedings providing at least one author registers and presents the work at the Conference (see the registration section of the conference website for more information about registration). Due to the large number of papers expected for this conference, the committee only allows an author to present one paper. Therefore if multiple papers are accepted for presentation different co-authors need to present each paper.
